Energy performance certificate (EPC)

142B LLANDAFF ROAD RIVERSIDE CARDIFF CF11 9PW	Energy rating **D**	Valid until:	**30 April 2031**
		Certificate number:	**2318-1511-1361-9491-1188**

roperty type	Top-floor maisonette
otal floor area	108 square metres

Rules on letting this property

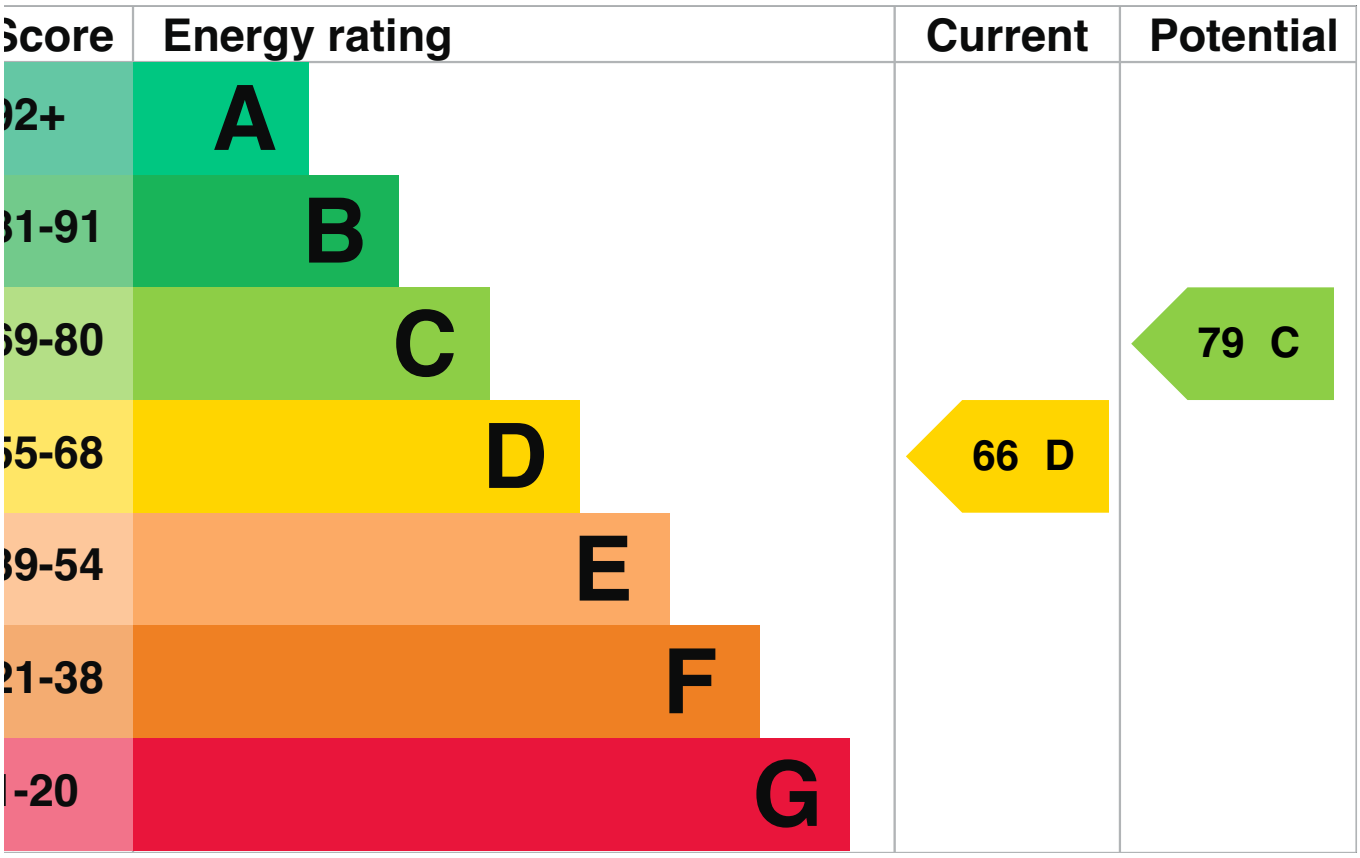
operties can be let if they have an energy rating from A to E.

u can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-nted-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

is property's energy rating is D. It has the potential to be C.

e how to improve this property's energy efficiency.



e graph shows this property's current and potential energy rating.

operties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your ergy bills are likely to be.

r properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

eatures in this property

atures get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based o w well features work or their condition.

sumed ratings are based on the property's age and type. They are used for features the assessor could not spect.

ature	Description	Rating

all	Sandstone or limestone, as built, no insulation (assumed)	Very poor
all	Solid brick, as built, no insulation (assumed)	Very poor
oof	Roof room(s), ceiling insulated	Very poor
oof	Pitched, 100 mm loft insulation	Average
ndow	Fully double glazed	Good
ain heating	Boiler and radiators, mains gas	Good
ain heating control	Programmer and room thermostat	Average
t water	From main system	Good
ghting	Low energy lighting in 64% of fixed outlets	Good
oor	(another dwelling below)	N/A
condary heating	None	N/A

rimary energy use

e primary energy use for this property per year is 214 kilowatt hours per square metre (kWh/m2).

About primary energy use

low this affects your energy bills

average household would need to spend **£901 per year on heating, hot water and lighting** in this property. ese costs usually make up the majority of your energy bills.

u could **save £354 per year** if you complete the suggested steps for improving this property's energy rating.

is is **based on average costs in 2021** when this EPC was created. People living at the property may use differe nounts of energy for heating, hot water and lighting.

eating this property

timated energy needed in this property is:

- 13,328 kWh per year for heating

- 1,960 kWh per year for hot water

mpact on the environment

is property's environmental impact rating is D. It has the potential to be C.

operties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

arbon emissions

n average household produces	6 tonnes of CC
his property produces	4.1 tonnes of CC
his property's potential roduction	2.2 tonnes of CC

u could improve this property's CO2 emissions by making the suggested changes. This will help to protect the vironment.

ese ratings are based on assumptions about average occupancy and energy use. People living at the property ay use different amounts of energy.

teps you could take to save energy

Do I need to follow these steps in order?

tep 1: Room-in-roof insulation

ypical installation cost	£1,500 - £2,70
ypical yearly saving	£22
otential rating after completing tep 1	74 C

tep 2: Internal wall insulation

ypical installation cost	£4,000 - £14,00
ypical yearly saving	£10
otential rating after completing eps 1 and 2	78 C

tep 3: Low energy lighting

ypical installation cost	£2
ypical yearly saving	£2
otential rating after completing eps 1 to 3	79 C

dvice on making energy saving improvements
